30 July 2026

Dear Hiring Manager,

I am writing to express my interest in the Software Engineer position at your company. I am currently in my fourth and final year of a Bachelor's degree in Computer Science and Engineering at the Royal University of Phnom Penh, and I am excited about the opportunity to bring my hands-on development experience to your team.

Over the past two years I have built practical experience across the full web stack: developing front-end interfaces with React.js, Vue 3, and AngularJS, and building RESTful back-end services with Laravel and Java Spring Boot. As a Web Developer Intern at Etec Center, I integrated APIs between front-end and back-end systems, optimised SQL queries for reporting, and built a note/task management application from the ground up. More recently, I have started exploring basic Android app development with Kotlin and UI/UX prototyping in Figma, which has given me a broader view of how design, mobile, and web development connect.

I work well in agile, cross-functional teams and enjoy solving problems independently as well as collaboratively. I am detail-oriented, committed to clean coding practices, and genuinely enjoy staying current with new tools and frameworks so I can bring fresh ideas to a project.

I would welcome the opportunity to discuss how my background and enthusiasm could contribute to your team. My CV is attached below for your review, and I look forward to the possibility of speaking with you further.

Sincerely,

Nam Tola

Nam Tola

Software / Back end Engineer

PROFILE

Final-year Computer Science and Engineering student and **full-stack developer** with hands-on experience in **web and back-end development, online payment integration, and server configuration**. Strong problem-solving skills, clean-code practices and a fast-learning, detail-oriented approach.

WORK EXPERIENCE

Web Developer Intern

Etec Center, Phnom Penh | Sep 2024 – Oct 2025

System Implementation

- **E-commerce Application** – Built with Vue 3 and Spring Boot; integrated an AI model feature and online payment ABA and Bakong KHQR.
- **Back-end System** – Developed with Spring Boot and AngularJS under the guidance of Professor Ouk Khean.
- **Note / Task Management System** – Built end-to-end with AngularJS and Laravel.
- **Personal Portfolio Website** – Built and deployed with React.js.

Integration & Database

- **RESTful APIs** – Connected front-end interfaces with Laravel and Spring Boot back-end services.
- **SQL** – Wrote and optimised queries for data retrieval and reporting.
- Understanding of the **Software Development Life Cycle (SDLC)**, including requirements analysis, system design, implementation, testing, deployment, and maintenance.
- Knowledge of **UML**, including Use Case, Class, Sequence, Activity, and System Architecture diagrams.
- Familiar with **Git/GitHub, code review, testing, debugging, CI/CD, Docker, and software deployment**.
- Understanding of **software architecture, design patterns, SOLID principles, clean code, and object-oriented programming**.
- Experience building **cross-platform mobile applications using Vue.js, TypeScript, and Capacitor**.

Infrastructure / Support

- **Windows Server** – Installed and configured the server; assigned user roles and permissions.
- **Network Support** – Troubleshooting and support for faculty projects.

Skills

Backend:
Java
Spring Boot / Spring Cloud
Eureka / Microservices
Dart Frog
PHP / Laravel / Vania
Node.js
REST API

Frontend:
React.js
Vue 3
AngularJS
JavaScript / TypeScript
HTML / CSS
Bootstrap / Tailwind CSS

UNIVERSITY PROJECTS

Royal University of Phnom Penh | Jan 2023 – Present

- **The Tourism Management Information System** – Software Engineering final-semester project (Year 4).
- **Dart Frog + MongoDB** – Developed back-end APIs.
- **E-commerce Store** – Designed UI/UX prototype in Figma (Year 4, Semester 1).
- **Team Web Applications** – Collaborated using Angular and Node.js; back-end features with the Vania framework.
- **Robotics (AI-assisted)** – Designed and built an AI-assisted robotics project.
- **C++ Programs** – Applied object-oriented programming principles.

EDUCATION

Royal University of Phnom Penh
Bachelor of Computer Science and Engineering | 2023 – Present (final year)

- AWS Academy Cloud Foundations
- Cisco CCNA 1 and CCNA 2

SOFT SKILLS

- Teamwork in agile, cross-functional teams
- Independent problem solving
- Detail-oriented, quick learner
